IGT, Abidjan, Cote d'Ivoire (Ivory Coast)	
<ul style="list-style-type: none">Develop a secure website for business.Collect Data from GPS, Satellites and transform Data for enterprises used.Used MySQL to store and used data for enterprise partners.	

SOFTWARE PROJECTS

InMyFridge: <https://kimester.github.io/inMyFridge/>
Webapp allows users to use the ingredients in their fridges better, reduce waste, and try out new recipes while using what they already have at home.

- Consumed third-party API (Spoonacular API) using JavaScript, and jQuery to display data on the web application
- Implemented the Web application styling using CSS and Materialize
- Used semantic Html to implement recipes and YouTube display blog

Lost-Pet : <https://hidden-shore-04969.herokuapp.com/home>
Lost Pet Finder allows a USER to create an account, generate a listing of their current lost pet, and display it on a page for local discovery. It allows other USERS to view current lost pets without an account.

- Implemented the REST APIs server-side with Node.js and Express using the MVC design for maintainability and scalability.
- Designed and implemented database script using Sequelize for mapping and MySQL.
- Implemented Google map component on the browse page
